

# EPE '13 ECCE Europe

3-5 Sept. 2013  
Lille, FRANCE

Deadline for digests  
1<sup>st</sup> December 2012

**EPE ECCE 2013** will be held in Lille, Northern France, at the crossroad of Paris, London and Brussels, to provide a forum in power electronics and applications. The main theme will be **power electronics for future transportation systems**.

## Scientific topics

- Power devices & components
- Power systems integration
- Power converters & control
- Electric drives & control
- Energy Storage Systems
- Education in Electrical Engineering
- etc.

## Applications

- Electric, Hybrids & Fuel Cell Vehicles
  - Electric trains, trams & subways
  - More electric aircrafts & propulsion ships
- but also*
- renewable energy
  - electric & smart grids
  - efficient power supplies
  - etc.

- ▶ Tutorials on future technologies
- ▶ Keynotes by worldwide well-known specialists
- ▶ Technical sessions on new developments and applications
- ▶ Exhibitions with future components and vehicles

EPE ECCE 2013 will be organized in a **carbon care philosophy**. We will try to reduce the conference ecological footprint. The CO<sub>2</sub> emissions associated with the conference (including travels of attendees) will be mitigated by funding carbon reduction projects.
