DESCRIPTION

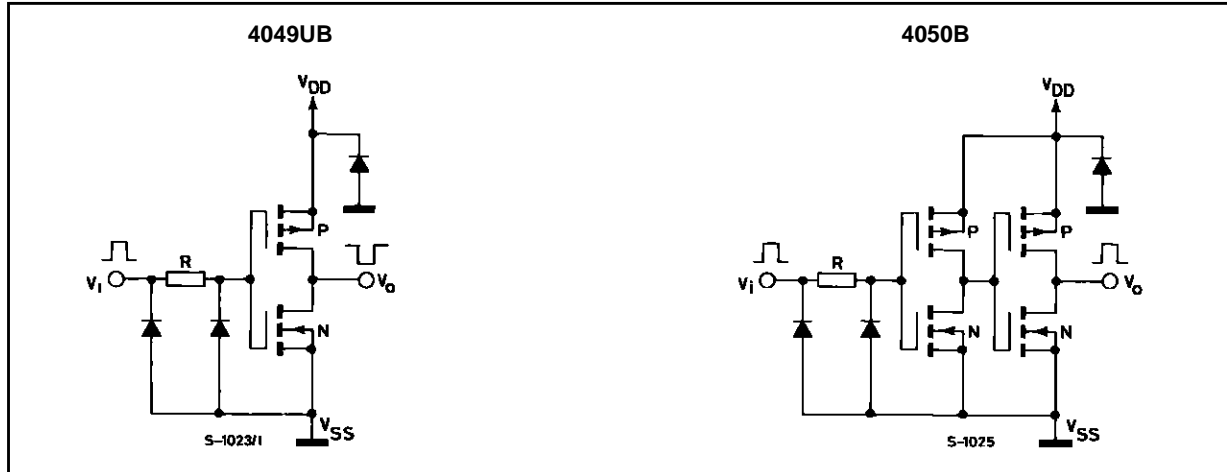

The **HCC4049UB/4050B** (extended temperature range) and the **HCF4049UB/4050B** (intermediate temperature range) are monolithic integrated circuits available in 16-lead dual in-line plastic or ceramic package and plastic micro package.

The **HCC/HCF4049UB/4050B** are inverting and non-inverting hex buffers, respectively, and feature logic-level conversion using only one supply voltage (V_{DD}). The input-signal high level (V_{IH}) can exceed the V_{DD} supply voltage when these devices are used for logic level conversions. These devices are intended for use as COS/MOS to DTL/TTL converters and can drive directly two DTL/TTL loads ($V_{DD} = 5V$, $V_{OL} \leq 0.4V$, and $I_{OL} \geq 3.2mA$).
