## VENUE

SPEEDAM 2006 International Symposium will be held in Taormina, at the “**Palazzo dei Congressi**” (on V. *Emanuele II* Square).

Founded in 358 B.C. by Dionysius, tyrant of Syracuse, Taormina had changing fortunes throughout its thousand years of history. Its first Greek name Tauromenion means built up in Tauro area, the mountain upon which it rose but it is also linked to the legend of Minotaur, frequently represented in ancient coins. Under Romans, Tauromenium enjoyed a great period of splendour so that many famous noble families built luxurious villas to stay there permanently.

Another evidence of its historical background is the famous "Ancient Theatre", built by the Greeks and restructured in the Roman age. During Middle Age the city was destroyed by the Arabs and in 1078 it was taken by the Normans, under whom it flourished and became the capital of Sicily. Today Taormina is famous all over the world not only for its ancient monuments and ruins of roman villas, but also for its irresistible fascination and the incomparable beauty of the landscape: eyes can space from the bay of Naxos to the Italian coast and to Etna, the most active volcano in Europe.

## HOW TO REACH THE VENUE

The best way to reach Taormina is by plane, landing in **Catania Airport** (named “Fontanarossa”), which is 60 km far from Taormina. Just in front to the International Arrivals in Catania Airport you can take a bus directly to Taormina city, according to the bus timetable shown here in the following. The transfer needs about 80 minutes. The bus terminal in Taormina (on *Pirandello Street*) is about 200 meters far from **Palazzo dei Congressi** (the Conference site) and near to several hotels. Bus tickets cost 5.00 (five) euros and can be bought only on-board.

You can arrive in Taormina also by train. The railways station of “**Giardini Naxos-Taormina**” is 3 km far from downtown (bus or taxi are needed to reach either hotels or the Conference site).

Starting from the Italian peninsula, you can reach Taormina by car, before crossing the "Stretto di Messina" on the ferry and then taking the highway "Messina→Catania"; the best exit is "North Taormina" (Taormina Nord).

## TECHNICAL PROGRAMME

Symposium starts on Wednesday, May 24<sup>th</sup> and closes on Friday, May 26<sup>th</sup> 2006. Pre-registration is scheduled on Tuesday, May 23<sup>rd</sup>.

Scientific contributions are organised in oral or in dialogue (poster) sessions. In both cases, the presence of the authors is requested, at least one per paper.

The papers scheduled for oral sessions will be presented in **Room A – “Teatro”** (1<sup>st</sup> floor), in **Room B – “Auditorium”** (ground floor) or in **Room C – “Sala Verde”** (4<sup>th</sup> floor), according to information on the timetable. Dialogue (poster) presentations are planned in the **Poster Area** at an intermediate floor.

## ORAL PRESENTATION OF THE PAPERS

Videoprojector+personal computer are available in the conference rooms “A”, “B” and “C”. Speakers can use their own laptop (mobile computer). Otherwise they can use either a DVD/CD-Rom or USB PEN-Drive on the room-computer, where Microsoft Power Point 2003 and Acrobat Reader 7.0 are installed. Please do not include audio data. All presentation files will be deleted at the end of the Symposium and no copy will be saved.

The time scheduled for each presentation is about 15 min. Questions to the authors are welcome: they can be allowed at the end of each presentation or at the end of the session, according to the decision of the chairman.

Speakers are kindly invited to fill in (typewriting or using capital letters) the form “Author/Speaker Information Sheet” available on the SPEEDAM website or at the Conference Desk. The data of this form are useful to the chairmen in order to correctly introduce the speaker of the paper to the people attending the session.

The file containing the paper presentation can be sent to the SPEEDAM secretariat by e-mail ([Speedam@unina.it](mailto:Speedam@unina.it)) not later than May 10<sup>th</sup> 2006; the e-mail “subject” must be **“papernumber – Presentation”**. The organizers recommend speakers to bring a backup copy (DVD, CD-Rom or USB PEN-Drive) of their presentation at the conference. The presentation file can be also directly transferred on the computer storage unit at the secretariat desk during registration or at arrival time. In this case, the file must be named **“papernumber – Presentation”** and clearly marked on the DVD/CD cover, together with the speaker name.

One the day of their presentation, speakers are also invited to contact their session-chairman at the **“chairmen meeting point”** 15 minutes before the starting of the session.

Both chairmen and speakers are requested to respect scheduled times.

## DIALOGUE PRESENTATION OF THE PAPERS

The poster should be in maximum **A0** (84 cm x 120 cm) **format** and only vertically oriented. No specific guidelines are provided for preparation of the poster. Speedam organizers suggest only to clearly show the title (minimum 72 pt) and authors name + affiliation (minimum 48 pt) and to use at list a 24 pt font for the body-text and figure captions.

At list one author per paper must be present during the dialogue session (90 min). Posters have to be placed in the reserved space from 60 min to 30 min before the session starting and removed in 60 min after the session. Otherwise posters will be destroyed by organizers.

In the **Poster Area** authors will find everything they need to fix poster on their locations.

### CONFERENCE LITERATURE

Each registered participant will receive a CD-ROM containing the Proceedings of SPEEDAM 2006 Symposium.

Printed copies of some papers can be requested at the Secretariat Desk.

### SYMPOSIUM FEES

- **Full registration for delegates:** € 700.00 (€600.00 before May 1<sup>st</sup>, 2006)

The fee includes: Attendance at all the Sessions, Symposium Proceedings on CD-ROM, Conference Materials, Welcome Cocktail, Lunches, Social Banquet, Coffees.

- **Reduced fee for students/PhD Students:** € 300.00 (€250.00 before May 1<sup>st</sup>, 2006)

The reduced student fee includes: Attendance at all the Sessions, Symposium Proceedings on CD-ROM, Conference Materials, Lunches and Coffee. Student (or PhD student) reduced fee can be applied to the students who simply participate in the Symposium or are co-authors of already registered papers. If a student is the only registered author of a specific paper, a full conference fee is needed for him.

- **Accompanying persons:** €200.00

The fee includes: Ladies' /Companions' Programme, Welcome Cocktail, Social Banquet.

Excursions will be organized (free of charge) for the accompanying persons, according to their number. Reservation for excursions can be made at the registration.

- **Additional Proceedings on CD-ROM:** €100.00

- **Additional banquet ticket:** €100.00

### SECRETARIAT DESK

The Secretariat Desk will operate according to the following schedule:

TUESDAY	23 <sup>rd</sup>	-----	16:00÷19:00 hrs
WEDNESDAY	24 <sup>th</sup>	8:00 ÷12:30 hrs;	13:45÷17:00 hrs
THURSDAY	25 <sup>th</sup>	8:30 ÷12:30 hrs;	13:45÷17:00 hrs
FRIDAY	26 <sup>th</sup>	8:30 ÷12:30 hrs;	-----

**11:00 FB2 - Measurements and Tests in Electrical Drives****[Room B]***Chairman: Landi C. - (Italy); Rotondale N. - (Italy)*

- 20297 *Särkimäki V., Tiainen R., Lindh T., Ahola J.* - (Finland)  
Applicability of ZigBee technology to electric motor rotor measurements
- 20367 *Bruzzone C., Honorati O., Santini E.* - (Italy)  
Spectral analyses of directly measured stator and rotor currents for induction motor bar breakages characterization by M.C.S.A.
- 20354 *Gabano J.D., Champenois G., Tnani S.* - (France)  
Synchronous generator parameters measurement from load impacts and shedding experiments
- 20195 *Kosonen A., Jokinen M., Särkimäki V., Ahola J., Niemelä M.* - (Finland)  
Motor feedback speed control by utilizing the motor feeder cable as a communication channel
- 20019 *Feng Z., Acarnley P.* - (U. K.)  
Interpolation technique for encoder resolution improvement in permanent magnet synchronous motor drives
- 20073 *Ahola J., Kosonen A., Toukonen J., Lindh T.* - (Finland)  
A new approach to data transmission between an electric motor and an inverter

**11:00 FC2a - Linear Motors and Actuators****[Room C]***Chairman: Budig P.K. - (Germany)*

- 17126 *Nasr Khoidja M.A., Ben Salah B., Brochet P.* - (Tunisie-France)  
Fuzzy logic control for a single sided linear induction motor
- 17293 *Bacher J.* - (Austria)  
Innovative designs of high dynamic linear asynchronous motors
- 17250 *Honda Y., Torii S., Ebihara D., Hasegawa Y., Hirata K.* - (Japan)  
Development of cylindrical two-dimensional linear oscillatory actuator

**12:00 FC2b - Power Devices in Power Electronics****[Room C]***Chairman: Raciti A. - (Italy)*

- 01065 *Enea V., Kröll D., Messina M., Ronsivalle C.* - (Italy)  
Different designs for the optimization of monolithic ESBT® (Emitter-Switched Bipolar Transistor)
- 01149 *Vershinin K., Sweet M., Ngwendson L., Sankara Narayanan E.M.* - (U. K.)  
Influence of the device layout on the performance of 20A 1.2kV clustered insulated gate bipolar transistor (CIGBT) in PT technology
- 01252 *Napoli E., Udrea F.* - (Italy)  
Circuit implementation of deep depletion SOI power devices

**12:45 Lunch**

**14:00 FB3 - Finite Element Analysis of Electrical Machines****[Room B]***Chairman: Arkkio A. - (Finland)*

- 21055 *Lin T.K., Meydan T.* - (U. K.)  
Parameters design with magnetic forces by 3DFEM for high positioning motor
- 21074 *Neumayer F., Schlemmer E., Ramsauer F.* - (Austria)  
Finite element analysis of the starting behaviour of large salient pole machines
- 21128 *Valtonen M., Parviaainen A., Pyrhönen J.* - (Finland)  
Electromagnetic field analysis of 3D structure of axial-flux solid-rotor induction motor
- 21303 *Tröster E., Sperling M., Hartkopf T.* - (Germany)  
Finite element analysis of a permanent magnet induction machine
- 21049 *Puranen J., Pyrhönen J.* - (Finland)  
Optimization of the loadability of an induction servomotor with a coupled electromagnetic-thermal model
- 21117 *Koo D.H., Chun Y.D., Han P.W., Cho Y.H.* - (Korea)  
Analysis of overhang effect in a novel axial flux PM motor
- 22009 *Shivkumar V.J., Rao Sr., Rao Sa., Vadivel M.* - (India)  
Design and simulation of a 5 kW single stage permanent magnet generator

**14:00 FC3 - Drive System Applications****[Room C]***Chairman: Magureanu R. - (Romania)*

- 25015 *Budig P.K.* - (Germany)  
Direct linear drives for the application in high vacuum
- 25063 *Zanandrea P.H., Gonçalves A.C.V., Ardisson E.V., Dias E.V., Campos J.F.* - (Brazil)  
Non-conventional application of AC drives - Use of AC drives in emergency systems. Case study: tilting system of torpedo car in CST BOF shop
- 25173 *Moehle A.* - (Germany)  
Optimization of converter-fed super-large drives with parallel winding systems
- 25188 *Wallace R.R., Tapia J.A., Diaz L.A.* - (Chile)  
Design of a 75 kW - 167 rpm axial-flux permanent magnet synchronous motor for copper mining applications
- 25192 *Dlugiewicz L., Kolowrotkiewicz J., Szelag W., Baranski M., Neumann R.* - (Poland)  
Electrical motor for liquid gas pump
- 26310 *Castellan S., Quaia S., Scialla P., Sulligoi G.* - (Italy)  
All-electric Mega-Yachts: Integrated power system operation and its interaction with propulsion converters

**15:30 FB4 - Converter Analysis and Modeling****[Room B]***Chairman: Nagy I. - (Hungary)*

- 02039 *Li H., Li Z., Halang W.A., Chen G.* - (Germany)  
Analyzing chaotic spectra of DC-DC converters using the Prony method
- 02017 *Moreno-Muñoz A., de la Rosa J.J.G.* - (Spain)  
Analysis of voltage dips in PWM AC-DC converters

Friday - May 26<sup>th</sup> 2006

- 02339 *Buti B., Nagy I., Masada E.* - (Hungary-Japan)  
Stability analysis of PWM-controlled dual channel resonant buck converter using PI controller

- 02146 *De Simone S., Adragna C., Spini C., Gattavari G.* - (Italy)  
Design-oriented steady-state analysis of LLC resonant converters based on FHA

**15:30 FC4 - Variable Reluctance Motor Drives****[Room C]***Chairman: Santini E. - (Italy)*

- 12124 *Mendrela E.A., Li X.* - (USA)  
Jumping switched reluctance motor operating as a hoist
- 12172 *Chai J.Y., Liaw C.M.* - (Taiwan)  
Power factor and vibration assessments for switched-reluctance motor fed by switch-mode rectifier
- 12193 *Bhiwapurkar N., Mohan N.* - (USA)  
Torque ripple optimization in switched reluctance motor using two-phase model and optimization search technique
- 10129 *Chang H.J., Liaw C.M.* - (Taiwan)  
Development of a front-end converter for switched-reluctance motor drive
- 12295 *Hudák P., Hrabovcová V., Rafajdus P.* - (Slovak Republic)  
Geometrical dimension influence of multi-barrier rotor on reluctance synchronous motor performances
