The XCE addition to the Xgen family of power supplies provides up to an incredible 1340W (peak power of 1450W) in an extremely compact 1U x 268 x 127mm package. Boasting an industry leading power density of 17W/in³ and efficiencies of up to 90%, the XCE family employs the innovative Xgen plug & play architecture that allows users to instantly configure a custom power solution in less than 5 minutes!

Ultra high efficiencies and high power density are made possible through the combination of low loss technologies and the best field-proven technologies in planar magnetics and surface mount electronics. Significantly increased efficiency reduces system thermal load by more than 50%.

The XCE can be populated with up to 6 *powerMods* selected from the table of *powerMods* shown below.

All configurations carry full safety agency approvals, UL60950, EN60950 and are CE marked. For alternative power interfaces contact support@excelsys.com
